Directions:

- Read the entire passage once.
- Find the Main Idea.
- Support the Main Idea with *at least 2* pieces of evidence from the text.
- Reread the entire passage again to check your answer.

**Farming allowed Native American people to grow more food. To grow the food, however, they would have to stay in one place to tend to their gardens and farms. As a result, tribes and people began living in larger, permanent villages. Village populations began to grow larger and, as a result, started to develop more complicated systems of government. Because they lived in larger groups, individuals within the tribe could learn and practice more specific/different skills.**

The Main Idea of the passage is:
