

Small Group Tiered Lesson Plan Template

LEARNING OBJECTIVE

4.4E represent the quotient of up to a four-digit whole number divided by a one-digit whole number using arrays, area models, or equations

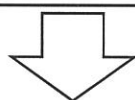

TEKS TREES

PRE-ASSESS

Groups determined by teacher prior to modeling based on formative assessments and teacher observation.

ENRICH

TSW solve division problems with **2-digit dividends and 1-digit divisors** by making connections between the area models they create with base 10 blocks and the equation.

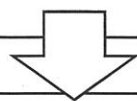

ON LEVEL

TSW solve division problems with **3-digit dividends and 1-digit divisors** by making connections between the area models they create with base 10 blocks and the equation.

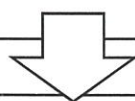

EXTEND

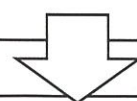

TSW solve division problems with **4-digit dividends and 1-digit divisors** by making connections between the area models they create with base 10 blocks and the equation.
