

Achievement Data

Timber Creek has always been a high achieving campus. When our new principal was chosen to lead the campus in 2015, she placed a new emphasis on PLC practices and processes. Our PLC journey has ensured that we maintain this high standard (100/80/60, as described in the PLC Story) meaning the expectation would be 100% of all learners would obtain grade level passing standards, 80% would exceed passing standards, and 60% would achieve masters level performance, while increasing the percentage of our students who exceed grade level expectations on state assessments. We have taken great pride in maintaining high expectations and not settling with our past accomplishments.
