

## Baxter Elementary FAST Reading Cohort Data - 2019 - 2023

The FAST is a screening tool for K-8 literacy and math within the FASTBridge data collection system. Students are given the test in the fall, winter, and spring. (Fall scores tend to be lower and to vary more after the summer break.) The data is used to make decisions about instruction, interventions, and progress monitoring based on growth from assessment to assessment. The chart below indicates the data for literacy from 2019-2023.
