Step 1: What parts of this data catch your attention?

Mult vs add question 2 was amazing!!!!

S+4=v age question was so much better than last year.

Lowest question was a graph with points and no line, show more next year.

9 of the 10 questions were 75% or better.

New question types tested very well.

Step 2: What does the data tell us? What does the data NOT tell us?

We kicked butt

Step 3: What good news is there to celebrate?

These kids are relating the 5th grade concepts to the 6th-grade concept in this chapter.

Step 4: What are the problems of practice suggested by the data?

Keep showing the different forms of graphs and using letters other than x and y

TIC TAC TOE boards were super successful
