

## Conditions for Learning 2018-2023

The Conditions for Learning Survey is a valuable source of data for our district. We know that children cannot learn when they don't feel safe, and that trusting relationships are the key to building a safe and collaborative culture. The charts below show our progress from 2018-2023. While there have been both significant dips and gains in all areas, the overall trend is positive. The most recent year, 2023, showed tremendous growth in all areas, with percent favorable increases from ten percent up to twenty-six percent. (Note: 2021-2023 data has been copied from Panorama; data from 2018-2019 has been recreated through Excel.)
