

Data Norms

GUIDING QUESTION IN DEVELOPING DATA NORMS:

*If a team were going to analyze **your** data set, what criteria or conditions would you want to be in place?*

1. Keep the best interest of all students at the forefront of our discussions and solutions
2. Come to the data meeting prepared
3. Don't use data that is analyzed and shared in team meetings for evaluative purposes
4. Use a data protocol to guide analysis and discussions
5. Focus on controllable variables
6. Participate meaningfully by contributing solutions/ideas for action research
7. Keep an open mind to ideas
8. Las Vegas
