

Foxes

Foxes are mammals. They have big bushy tails and pointy faces. They have thin legs.

Foxes have fur. Their fur can be different colors. Their fur can be white, tan or gray.

They have short fur in the summer. They have long fur in the winter. They lose their old fur each spring.

Foxes are hunters. They hunt mostly at night. They hunt small animals like birds and mice.

Foxes live in dens. They sleep there most of the day.

As you can see, foxes are interesting animals.
