

Liberty STAAR Growth Trends

2016 - 2019

June 12, 2019

This report only includes the first Spring administration growth levels for students taking the regular STAAR or EOC for all exams except for 5th and 8th Math and Reading. For 5th and 8th Math and Reading it includes the best student performance from the first and second administrations. Only tests with a STAAR Progress indicator are included. The Expected Growth data points include all students who had expected growth or above (ie. they showed at least a year's worth of growth). Therefore, all students with accelerated growth are also included in the expected growth numbers.
