

Mission: To create the highest quality public school that maximizes student achievement, expands student opportunities, and prepares students for success in a globally competitive world.

Vision: High levels of learning for ALL students.

Principal's Message:

Welcome to The Mill. We hope that you find our school to be an authentic learning environment for your child. Our goal is for ALL students to learn at a high level. We recognize that all students do not learn at the same speed or in the same way. Our teachers work hard to individualize instruction to meet the needs of each student. More important than instruction is meeting the social/emotional needs of a student. We want students to leave here knowing how to face the world ahead and have the tools needed to be successful.

Our promise to you is that no matter who your child has as a teacher, we will ensure that they receive the additional time and support they need to achieve at a high level. We also promise to love your child and keep them safe each and every day.

If we can ever be of help to your family, please contact us. We have the resources available in the community to address needs outside of education. Please partner with us to help your child reach their potential and beyond.
