Within our school, we ensure we use multiple data points to measure progress. Our most important assessments analyzed to improve student outcomes are common formative assessments within our units of study. i-Ready is used as a diagnostic and benchmark to determine if our unit-based work is translating to measured skills. Just as common formative assessments, we are able to use i-Ready to improve our practice and respond to student specific needs. Where we don't see continued improvement in student outcomes, we create action plans for improved outcomes. This is a testament to the hardworking educators of Prairie View Elementary. Action plans can include support of instructional coaching, team problem solving, instructional rounds, collaborative professional learning, or focusing SLO goals on data-based needs. Over time, we are able to see that this process provides improved outcomes for students. Triangulation of data is also important to us. As an example, you may see that reading data for 4th grade appears to have not improved using i-Ready data. However, when we use multiple assessments the data story changes. The state exam results show that 4th grade reading data has increased performance over the state average as compared to 2018-2019.

School Student Achievement Data

State Accountability: WI Forward Exam

Percentage of Students Meeting or Exceeding Proficiency

GRADE LEVEL: 3

SUBJECT	2018-2019		2019-2020 NOTE: There was no state testing or end-of-year benchmark data.		2020-2021		2021-2022
